Ref. By Clinic : DR.LEILA

Lab No : 226014  
AL No : 62249  
Entrance Tm: 12-AUG-2024 19:45:04  
Exit Date : 13-AUG-2024 10:10:50  
Ext. Ref. Num.: 039368

| TEST                | RESULT       | UNIT  | REFERENCE VALUE                                                    |
|---------------------|--------------|-------|--------------------------------------------------------------------|
| Prolactin           | 6.06         | ng/ml | 3-25 ng/ml                                                         |
| Testosterone(Total) | 4.57 $\pm 6$ | ng/ml | (00-14) years : 0.1-3.7<br>(15-70) years : 2.27-10.30              |
| Free Testosterone   | 10.9 $\pm 6$ | pg/ml | 12-39 age : 9.2-34.6<br>40-59 age : 6.1-30.3<br>≥60 age : 6.1-27.9 |

Note:

Only approx. 2% free testosterone are (immediately) available for the active biological effect. Under normal conditions, free testosterone always correlates with total testosterone with a few exceptions (hyperthyroidism, antiepileptics) in which an increase of total testosterone is not accompanied by an increase of the free, biologically active testosterone.

Indication: Females: hyperandrogenism/PCO-syndrome with hirsutism, virilization, acne, suspicion of testosterone synthesizing tumors;  
Males: testicular malfunction, monitoring testosterone substitution, suspicion of testosterone synthesizing tumors

Evaluation: Female: Hyperandrogenism with hirsutism, virilism, acne, suspicion of testosterone-producing tumors;  
male: Suspicion of incretoric dysfunction of gonads, monitoring of testosterone substitution, suspicion of testosterone-producing tumors.
