Normal Flora of Female genital tract grown after 48 hours of incubation.

Comments: The most common kinds of Vaginal infections are:

- " Bacterial vaginosis.
- " Candida or "yeast" infections.
- " Gonorrhea.
- " Trichomoniasis.
- " Chlamydia.
- " Reactions or allergies (non-infectious vaginitis)
- " Viral vaginitis(HPV)
- " Genital Herpes
- " Genital warts
- " Rarely Urea plasma and Mycoplasma.

Bacterial cultures are performed to isolate and identify the Bacterial, Candida and Gonorrhea infection. Culture negative samples are advised to correlate with the clinical symptoms, and advised for appropriate Prophylaxis.
